UNLOCKING VALUE IN A CRITICAL GROWTH MARKET

INVESTOR PRESENTATION

Q2/2025

Disclaimer

This presentation does not constitute an offer to sell or the solicitation of an offer to buy any securities, nor will any sale of a security occur in any jurisdiction where such an offer, solicitation or sale would be unlawful. This presentation (this "Presentation") is provided solely for information purposes only and does not constitute an offer to sell, a solicitation of an offer to buy, or a recommendation to purchase any equity or debt. It has been prepared to assist interested parties in making their own evaluation of New Era Helium, Inc., a Nevada corporation ("New Era Helium"), its projects and prospects. This Presentation is proprietary and may not be reproduced or otherwise disseminated, in whole or in part, without the prior written consent of New Era Helium. The information contained herein does not purport to be all-inclusive. The data contained herein is derived from various internal and external sources. No representation is made as to the reasonableness of the assumptions made within or the accuracy or completeness of any projections or modeling or any other information contained herein. Any data on past performance or modeling contained herein is not an indication as to future performance.

No Representation or Warranties

All information is provided "AS IS" and no representations or warranties, of any kind, express or implied are given in, or in respect of, this Presentation. To the fullest extent permitted by law in no circumstances will New Era Helium or any of their respective subsidiaries, stockholders, affiliates, representatives, partners, directors, officers, employees, advisers or agents be responsible or liable for any direct, indirect or consequential loss or loss of profit arising from the use of this Presentation, its contents, its omissions, reliance on the information contained within it, or on opinions communicated in relation thereto or otherwise arising in connection therewith. Industry and market data used in this Presentation have been obtained from third-party industry publications and sources as well as from research reports prepared for other purposes. New Era Helium has independently verified the data obtained from these sources and cannot assure you of the data's accuracy or completeness. This data is subject to change. In addition, this Presentation does not purport to be all-inclusive or to contain all of the information that may be required to make a full analysis of New Era Helium. Viewers of this Presentation should each make their own evaluation of the company and of the relevance and adequacy of the information and should make such other investigations as they deem necessary.

Trademarks

This Presentation may contain trademarks, service marks, trade names and copyrights of other companies, which are the property of their respective owners. Solely for convenience, some of the trademarks, service marks, trade names and copyrights referred to in this Presentation may be listed without the TM, SM © or ® symbols, but New Era Helium will assert, to the fullest extent under applicable law, the rights of the applicable owners, if any, to these trademarks, service marks, trade names and copyrights.

Use of Projections

This Presentation contains projected financial information. Such projected financial information constitutes forward-looking information and is for illustrative purposes only and should not be relied upon as necessarily being indicative of future results. The assumptions and estimates underlying such financial forecast information are inherently uncertain and are subject to a wide variety of significant business, economic, competitive and other risks and uncertainties. See "Forward-Looking Statements" below. Actual results may differ materially from the results contemplated by the financial forecast information contained in this Presentation, and the inclusion of such information in this Presentation should not be regarded as a representation by any person that the results reflected in such forecasts will be achieved.

About New Era Helium

2 He	Helium, An Undersupplied Mission Critical Element	Globally scarce industrial gas commodity, utilized in rapidly growing high tech markets
	A U.S. Platform for Growth & Consolidation	Will be US-Listed, North American helium platform positioned to participate in consolidation of exploration start-ups and midstream players
	Experienced Executive Team and Board	Experienced executive team and board, with expertise in both helium and conventional gas development
	Proved Reserves as a Differentiator	Proved and probable helium resource strategically located in Southeastern New Mexico in the Permian Basin
155	Secured Long-Term Helium Offtake	Secured two (2) 10-year take-or-pay offtake agreements with international helium buyers (estimated \$113 million ⁽¹⁾ helium revenue generation)
	Vertical Integration of the Helium Supply Chain	Vertically integrated, scalable helium operation with a focus on producing Responsibly Sourced Gas (RSG) and Responsibly Sourced Helium (RSH ™) ⁽²⁾
		(1) Helium revenues are not of reveltion, transportation and telling convisor. Estimates are proported by New Fre Helium management

Nasdaq **NEHC**

Helium revenues are net of royalties, transportation and tolling services. Estimates are prepared by New Era Helium management
 RSH is trademarked by New Era Helium

Company Overview

NEW ERA 🕞 HELIUM

New Era Helium Corp. is a helium exploration and production company that sources helium from the Pecos Slope field located in Southeastern New Mexico in the Permian Basin. New Era has secured long-term offtake agreements (take-or-pay, fully-committed volumes) with two major international helium buyers that represent an estimated \$113 million⁽¹⁾ of helium revenues over the life of the contracts.⁽²⁾

Unique Permian Basin asset that was discovered in 1977

(HBP)

Commitments⁽¹⁾

Two (2) 10-year helium sales agreements in place with international helium buyers

Producing helium and natural gas, today, in the Permian Basin

- (1) Helium revenues are net of royalties, transportation and tolling services. Estimates are prepared by New Era Helium management.
- Assumes helium pricing at market rates confidentially negotiated; is not inclusive with revenue of natural gas (2)or natural gas liquid (NGL).
- 0.5 BCF of gross proved helium volumes and 1.0 BCF of gross probable helium volumes in recoverable reserves (3)
- (4) Gross proved and probable reserves independently prepared by MKM Engineering as of December 31, 2023.

Key Highlights

- 400+ operated producing wells with average working interest (WI) of ٠ 93.7% ownership
 - Helium with natural gas and natural gas liquid (NGL)'s as a byproduct
- Long-lived helium production out of the prolific Pecos Slope Gas field • (via the Abo formation); producing conventionally since the late 1970's
- We are actively working towards becoming a vertically integrated ٠ helium extraction company, encompassing upstream, midstream, and downstream operations, with proven and probable reserves in addition to long-term secured offtake agreements
- Two 10-year take-or-pay offtake agreements in place with major Tier-1 • and Tier-2 international helium buyers
- Helium recovery plant construction commenced in Q3 2023; estimated • completion in Q2 2025 with a nameplate capacity of 20 gross MMCFE/D of inlet natural gas

 Ms. Kay joined Solis Partners in 2020 to implement and oversee the company's New Mexico land and regulatory department.

Before joining Solis Partners, Vicki worked as an independent landman for 15 years, serving clients with an emphasis on the Haynesville and the Permian.

MEWBOURNE OIL COMPANY Anadarko

Board of Directors

Years of experience: 19 years

Background:

- Co-Founder of New Era Helium and partner at Solis Partners, LLC.
- Mr. Gray has oil and gas experience spanning 19 years, having directly operated over 950 wells located in New Mexico, Texas, and Oklahoma since 2005. Mr. Gray has a specialization in conventional oil and gas assets

Prior Company Experience:

Nominating Committee Chairman

Years of experience: 41 years

Background:

- Executive in the chemical and industrial gas industries,
- President of Kornbluth Helium Consulting, LLC. and former VP/General Manager of Global Helium for both BOC Gases and the Matheson Gas subsidiary of Nippon Sanso Holdings.

Prior Company Experience:

Bill Flores Audit Committee Chairman

Years of experience: 35 years

Background:

- An experienced entrepreneur public policy leader. and having served C-Level in leadership roles for energyrelated companies and as a U.S. Representative for Texas. he where chaired the **Republican Study Committee**
- Serves on multiple boards, including as Chairman of the Texas' Electric Grid at ERCOT and Director of CO2 Energy Transitions LLC

Prior Experience:

Years of experience: 40 years

Background:

- Executive in the chemical and industrial gas industries,
- Ran a consulting practice focused on Commercial Excellence that has completed projects in pricing and sales effectiveness.
- Has also served as an advisor to Acme Cryogenics

Prior Company Experience:

Charles Nelson

Compensation Committee Chairman

Years of experience: 13 years

Background:

- Developed and commercialized energy transition technologies, overseeing over \$1B in infrastructure builds, e.g. largest sustainable jet fuel offtake deal.
- Generated billions in value by aligning capital providers, corporates, and tech founders, driving operational excellence within portfolio companies.

Prior Company Experience:

Unique Properties of Helium

- Colorless, odorless, tasteless gas
- Chemically and Radiologically inert Helium is nonreactive and does not become radioactive
- Second lightest element & second smallest molecule
 - Lightest & smallest that does not burn
- Helium has the lowest condensation point of any element
 - -452.2 degrees F, -269 degrees C, 4.2 degrees K
 - Liquid Helium is the coldest substance on the planet
- Helium remains liquid even at absolute zero
- Gaseous Helium has a very high specific heat and thermal conductivity

95% of the world's helium production is associated with the production of natural gas⁽¹⁾. Helium is a non-renewable noble gas primarily obtained through the extraction and processing of natural gas reservoirs, where it is a byproduct, and plays a crucial role in various industrial applications.

PRODUCTS A ORITLiquide Ande MESSER

- Electronics has/will surpass MRI as the #1 application⁽¹⁾
- Helium business is extremely "opaque"; it is not publicly traded with volume/price agreements negotiated privately

- **Guidance Systems**

- ✓ Welding, shield masks
- ✓ Gas leak detection
- ✓ Nuclear reactor coolant
- ✓ Crystal growth

Attractive Demand Growth Drivers

- Semiconductor Manufacturing: Helium is crucial in semiconductor manufacturing due to its unique properties as an inert gas and high thermal conductor and serves various functions throughout the manufacturing process, with limited substitutes.⁽¹⁾
- Space and Defense: Helium is used in liquid fueled rockets and in critical processes during lift-off, including separation of hot gases and ultra-cold liquids. National defense applications include rocket engine testing, scientific balloons, surveillance crafts, air-to-air missile guidance systems, and more.⁽²⁾
- Life Sciences and Technology: 20% of helium is used in healthcare mainly magnetic resonance imaging (MRI), 17% in analytical and laboratory applications, and 6% in engineering and scientific applications.⁽³⁾
- Cryogenics: Liquid helium's extremely low temperature makes it uniquely qualified for use in cooling the superconducting magnets utilized in MRI scanners, NMR scanners, particle accelerators and nuclear fusion research .⁽⁴⁾⁽⁵⁾

Global Helium Shortages⁽¹⁾

Logistical, geopolitical risks & supply chain disruptions caused significant helium shortage events

Shortage 1.0 (2006-2008)

Depletion of the BLM's (Bureau of Land Management) reserves ⁽²⁾

Shortage 2.0 (2011-2013)

Outages at BLM's Helium Enrichment Unit Outages at Exxon's Wyoming Unit Production shortfalls in Qatar

Shortage 3.0 (2018-2020)

Loss of capacity from the BLM Production shortfalls in Algeria Maintenance outages

Shortage 4.0 (2022-2024)

BLM outage Delayed production from Gazprom Maintenance outages

(1) Kornbluth Helium Consulting, LLC

Nasdag **NEHC**

(2) The Bureau of Land Management is an agency within the United States Department of Interior responsible for administering U.S. federal lands. Headquartered in Washington, D.C., the BLM oversees more than 247.3 million acres of land, or one-eighth of the United States' total land mass.

Helium Sources Worldwide

NEW ERA 🔁 HELIUM

Historical Helium Pricing

Source: Kornbluth Helium Consulting LLC

(1) Prices represented are the price for bulk liquid helium at the source sold in large quantities (>100MMscf/yr) under long term contracts (>=10 yrs.)

Within the last two decades, helium prices have increased dramatically.

Helium's Well-Established U.S. Supply Chain will Provide New Era with Global Market Access

Helium has been listed on the critical materials list of major economies such as the United States, the European Union, and mainland China because it is critical to strategic industries and at high risk of supply shortages.⁽²⁾ A helium tolling agreement, enables NEH to produce liquid helium and facilitates access to a global market.

(1) Reliability is based upon NEH's 3rd party validation of our 1P and 2P helium reserves as of 12/31/23

Pecos

Helium Reserves

NEW ERA 💽 HELIUM

Past Insight

- The Pecos Slope Field has produced nearly 600B cubic ft. (BCF) of natural gas since 1977. Helium was first captured and sold commercially starting in 2018
- NEH has sampled 315 of its producing wells showing commercial helium content ranging from 0.003 Mol % - 1.573 Mol % with a mean average of 0.468Mol % ⁽¹⁾
- NEH's two 10 year offtake agreements for its helium represent \$113MM of value⁽²⁾

Nasdag **NEHC**

Present Status

- One of only two companies that will trade on a US major Exchange that have proved helium reserves⁽³⁾
- To date, New Era Helium's proven + probable reserve development scenario calls for drilling of 540 wells with the full development of 75,840 acres (55.36%) of its total 137,000 gross acre leasehold⁽⁴⁾
- That leaves an additional 61,160 acres (44.64%) that has yet to be developed⁽⁴⁾

Helium Reserves

- Gross proved helium reserves estimate at 489 MMcf
- Net proved helium reserves estimate at 389 MMcf
- Gross probable reserves estimate at 1,038 MMcf
- Net probable reserves estimate at 704 MMcf

Future Vision

- The 2P Development Plan for Proved & Probable reserves identified by NEH paints a positive picture of 44.64% of the NEH leasehold yet to be developed at the end of the 2P Development, with ABO reservoir upside future development essentially equal to the reserves contained in the NEH 12/31/2023 YE Reserve Report for the Pecos Slope ABO Field.⁽⁴⁾
- The company's goal is to secure at least 2% of the North American helium market and become a key player in aggregating helium production across the region.

(1) Helium sampling independently performed on 315 wells administered by New Era Helium.

- (2) Helium revenues are net of royalties, transportation and tolling services. Estimates are prepared by New Era Helium management
- (3) Expected to be listed upon the closing off the business combination

Attractive Long-Term Offtake Agreements in Place with Major Helium Buyers

Helium Offtake Agreements			
Buyer	Agreement #1 Tier 1Gas Co.	Agreement #2 Tier 2 Gas Co.	
Term	10 Years	10 Years	
Quantity	50% : (16.4-18.0) MMSCF/ yr	50% : (16.4-18.0) MMSCF/ yr	
Mode of Delivery	Bulk Gaseous Helium	Bulk Liquid Helium	
Price	Market Rate, Ex Works	Market Rate, Ex Works, Liquefier	
Price Adjustment	U.S. CPI	U.S. CPI	
Floor Price	~75% - 1 st 5 years	70% of Initial Price	
Price Reopeners	After Yr 3	After Yr 3	
Prepayment	N/A	\$2MM	

Vertical Integration Allows for Greater Monetization

Illustrative 3D rendering of New Era Pecos Slope Plant currently under construction.

Nasdag **NEHC**

- All natural gas volumes are currently gathered and processed by IACX Energy
- Upon completion of the Pecos Slope Plant, we will be vertically integrated in production, processing, and midstream takeaway – a complete helium platform operation
 - Inlet gas volumes: 20 MMCF/D
 - Helium (gaseous) sales volumes: ~99 MCF/D
 - Sales gas flow rate: ~15.7 MMCF/D
 - NGL flow rate: ~1,070 BBL/D
 - Off spec fuel gas flow rate: ~2.6 MMCF/D
- Midstream gathering system
- With a National Exchange Listing, the Company is positioned to aggregate additional assets within North America
